YOUR HAIR'S TRUE POTENTIAL

INTRODUCING THE nanoSmooth® TREATMENT

The nanoSmooth treatment is the leading smoothing product. It is a revolutionary hair care management system designed to eliminate frizz, lock in colour and enhance shine. It creates a fantastic smoothing treatment that will last up to 100 days. The results clients experience are truly breath-taking and life-changing.

The nanoSmooth treatment unique technology where-by it breaks down keratin to a micro molecular size enabling it to penetrate into the hair shaft to create smooth, manageable hair even to those with the most unruly hair types.

The nanoSmooth treatment is formulated with patented Biomimetic ingredients, Keratin, Amino Acids and Proteins designed to add strength, moisture and manageability.

THE BENEFITS ARE:

- Eliminates frizz
- Repairs damaged hair
- Reduces blow drying time by up to 80%
- Allows easier styling of hair
- Enhances and locks in colour and stops colour from fading
- Increases shine and smoothness
- Lasts up to 100 days*

* Please speak to your stylist to find out more information on how it can benefit you.

NANOKERATIN SYSTEM HOME CARE

To prolong and enhance the treatment it is imperative that you use the following products to ensure your hair stays beautiful and manageable.

Sensitised Hair

RE-ENHANCE Refining shampoo – Sensitised / Chemically treated hair

This shampoo added with extra oils to help enhance moisture levels and increase shine to highlighted hair. The ingredients help restore its vitality and shine

REFINE Refining conditioner – Sensitised / Chemically treated hair
Helps restore optimum moisture levels and nutrients whilst enhancing highlights. For those with dry unruly hair, this conditioner helps invigorate and improve your hairs texture

REJUVENATE Refining mask – Sensitised / Chemically treated hair
This mask rejuvenates hair while providing a deep conditioning treatment to restore optimum moisture levels and nutrients and enhance the hair's highlights. Leaving your hair smooth, silky and frizz-free.

Coloured Hair

RESTORE Preserve colour shampoo – Coloured hair

this shampoo designed to cleanse your hair without stripping colour. Ant- fade effect derives from natural ingredients that provide intensive treatment for dry, frizzy hair.

RECONDITION Colour preserving conditioner – Coloured hair
Built in with an anti-fade effect, replenishes post treated hair with optimum moisture levels and nutrients. The natural ingredients help create a buffer against harmful toxins.

REPLENISH Colour preserving mask – Coloured hair
This anti-fade effect derives from our effective conditioning components – pure natural ingredients that penetrate from roots to tips, leaving your hair smooth, silky and frizz-free without stripping its colour.

nanoSmooth®

Natural Hair

REVIVE Invigorating shampoo – Natural / Untreated hair

This shampoo enhances the treatment but effectively cleanses your scalp and hair, enhancing it with essential oils and hydrolyzed keratin.

REHYDRATE conditioner – Natural / Untreated hair

Replenishes post treated hair and restores optimum moisture levels and nutrients. Creates a buffer against environmental toxins

REVITALISE Revitalising Mask – Natural / Untreated hair

This unique combination of our essential components nourishes your hair by penetrating from roots to tips, leaving your hair smooth, silky and frizz-free.

All Hair Types

REINVENT Leave in conditioner – All hair types

This Leave in conditioner provides optimum moisture, leaving your hair flexible, easy to style and maintain. Reinvent Leave in conditioner serves as an additional shield to UV rays to help protect your hair.

RESEAL Soft Keratin Serum – All hair types

This Serum restores your hair and provides a layer of protection against toxic environmental elements, to create smooth and frizz-free hair.

FAQ

We understand that with new services often comes lots of questions, here are a few of the most FAQ's. If you find what you are looking for, then please ask your stylist.

Q: Is the nanoSmooth Treatment appropriate for all hair types?

A: Yes – all hair types can benefit, especially effective for rejuvenating damaged, coarse and chemically treated hair. It will also eliminate frizz for those with virgin, unruly hair.

Q: Can the nanoSmooth Treatment be applied to hair that has previously undergone chemical treatments, including hair straightening procedures?

A: Yes – nanoSmooth can be applied to hair that has undergone any type of chemical treatment including straightening.

Q: How long does the nanoSmooth Treatment take to apply?

A: Approximately 90 minutes for short hair and 120minutes for longer hair.

Q: How long does the nanoSmooth Treatment last in a clients' hair?

A: It will last in the clients' hair for up to 100 days as long as the clients are using the Nanokeratin System aftercare shampoo and conditioner, this will also depend on the hair type.

Q: How often should the nanoSmooth Treatment be undertaken?

A: You will see the results starting to fade out of your hair, but it is approximately 3-4 months depending on your hair type.

Q: I want to book in for a cut & finish, should I do so before or after my nanoSmooth Treatment?

A: After to help style and cut off the split ends.

Q: Should I colour my hair before or after the nanoSmooth Treatment?

A: Ideally the treatment should be applied on the same day directly after colour to lock in the shine and enhance the colour. Otherwise it is recommended to wait 10 days after having the treatment to then colour your hair.

Q: Will my hair go completely straight after having this smoothing treatment?

A: The nanoSmooth is designed to work with your hairs natural texture, so the result depends on your hair type. It will eliminate frizz, but enhance the shine and smoothness.

Q: Does the nanoSmooth treatment contain formaldehyde?

A: There is a trace level of formaldehyde of 0.18% to stop bacteria. The legal limit in the EU is 0.2%, you can be assured that the treatment is non-harmful.
